

ABERDEEN ANGUS 2014

VRAY RED ZAI 031

RED DMM BRYLOR THUMP 2Tx RED BJR MAKE MY DAY 981

CZ 795553031 *17.04.2012

Relative breeding values – direct effect, CZE, 12/2013

120 days	210 days	365 days	Index - growth
124	124	123	124

Vray was born in the herd of Ing. Jan Kofroň. This red Angus herd is coming from embryos bought in Canada. Vray grew in the period in Cunkov performance test station 1991 g daily. His daily gain from the birth up to the end of the test period was 1585 g. Vray's father is canadian insemination bull Brylor Thump, which has in the Czech Republic 48 offspring and received direct breeding value for growth 120.

VIZIGOT RED ZAI 043

ROY RED x KREOL RED

CZ 789116031 *3.6.2012

Relative breeding values – direct effect, CZE, 12/2013

120 days	210 days	365 days	Index - growth
101	94	111	102

Vizigot was born in the well known Czech herd ZD Brloh. He has Canadian-American pedigree. His daily gain from the birth up to finish performance test was 1420 g. Vizigot received linear exterior evaluation 75 points, being his breeding type was rated by 8 points.

SMUGGLER ZAA 759

CATRIONAS ELLISAND D131 x JAKARTA
CZ 630512032 *14.2.2009

Relative breeding values – direct effect, CZE, 12/2013

120 days	210 days	365 days	Index - growth
127	131	136	131

EASY CALVING

Smuggler comes from the same herd of Mr. Silovsky, who decided to use insemination doses of Scottish bull Catrionas Ellisand on a daughter of well-known Czech bull Jakarta. The result of this fusion is Smuggler, a bull with excellent growth in performance test station. His breeding values of growth, frame, body capacity, muscling and breeding type has brought him among the top bulls of Aberdeen Angus breed in Czech Republic. Smuggler is a bull fully useable in crossbreeding too.

TEAM ZAA 829

PLAYBOY RED x LCHMN SHARPSHOOTER 1369
CZ 681224031 *18.3.2010

Relative breeding values – direct effect, CZE, 12/2013

120 days	210 days	365 days	Index - growth
137	135	141	137

Team is black bull, but he is also red factor carrier. Therefore, Team transmits the recessive gene for red colour to his progeny. As well as his father, Team has a big frame and an excellent growth ability. Father of his mother, insemination sire Sharpshooter, ranks among sires which has strongly affected Angus breeding all around the world in last decade.

PAUL RED ZAA 682

KREOL RED 1M x RADY LAZY SBJ HOBO 12E
CZ 585002031 *7.4.2007

Relative breeding values – direct effect, CZE, 12/2013

35 progeny/1 herd

120 days	210 days	365 days	Index - growth
96	103	105	101

Paul Red is a result of US paternal and Canadian maternal bloodlines meeting. Very good maternal genetic comes from the paternal side – his father Kreol Red has RBV for maternal effect 114 based on 37 daughters. Very good muscularity is transmitted from maternal side bull Red Lazy Hobo, who was imported from Canada. Paul Red's progeny shows excellent frame and growth potential as well as good conformation. As his calves are born easily, Paul Red is being used in matting with heifers.

SKOT ZAA 762

IDVIES EURIS B112 x LEGENDA
CZ 603096053 *4.2.2009

LIMITED STOCK AVAILABLE

Relative breeding values – direct effect, CZE, 12/2013

120 days	210 days	365 days	Index - growth
100	107	104	104

Skot represents another successful result in Aberdeen Angus breeding system in the Czech Republic. The bull proves that Angus breed can connect big frame and excellent muscling. His breeder Mr. Dvorak liked Skot so much that he decided to keep and use him in his own herd. However, Mr. Dvorak lent Skot to Natural insemination station, therefore his doses are available for all breeders nowadays. Skot's breeding values of exterior, namely of body capacity and muscling are absolutely outstanding. Calving is without problems and calves from Mr. Dvorak herd will confirm Skot's real genetic traits soon.

TEXEL RED ZAA 822

PLAYBOY RED x KUNA RED
CZ 717945031 *23.3.2010

Relative breeding values – direct effect, CZE, 12/2013

120 days	210 days	365 days	Index - growth
128	130	132	130

Texel Red comes from Mr. Lepsa farm Pecin. Mr. Lepsa is a pioneer of red Angus in the Czech Republic. Texel is outstanding for his breeding value of growth, which was transmitted from his father Playboy Red (BV-growth 141!!) His breeding values for body conformation are also very good. Texel Red is another proof that red Angus can show good growth, have got big frame and can be good muscled.

SATEN RED

NORIS RED POLMER x MONLINE RED 7 U-TREND 701
CZ 631262031 *20.4.2009

EASY CALVING

Relative breeding values – direct effect, CZE, 12/2013

120 days	210 days	365 days	Index - growth
105	114	120	113

We bought Saten Red immediately after ending the Testation Period in Osik Performance Test Station. The bull is very compact, with firm legs and back. He has got very docile temperament and it is very easy to manipulate him. Very good muscling, easy calving and viable calves predetermine him to be used in crossbreeding with all dairy, combined and beef breeds.
