

# POLLED BEEF SIMMENTAL INSEMINATION DOSES OFFER

## INTERNATIONAL TESTATION DENMARK + CZECH REPUBLIC

### Krogholt Godske P ZSI 950

Hedetoft Vito PP ZSI 495 x Hedetoft United P ZSI 400

DK 1141200351 \*6. 9. 2011

Godske's breeder live in the eastpart of Denmark and his name is Flemming Krogholt. He is breeding Beef Simmental and also started to breed polled Hinterwalder. He started with Simmental 30 years ago.

He breeds around 15 cows and is using only insemination in his herd. His aim is to breed only functional cows producing calves of good growth and which are easy calving. He is really satisfied with United and Vito that is why we can find these two bulls in Godske's pedigree. Godske started the test in 225 days of age with a weight 433 kg. His weight was 757 kg in the end of the test in 365 days of age. His daily gain was 2314 g. This result is 10 % above average result of tested bulls of the same age.

#### Pedigree:

Vito's breeding value for growth in direct effect is 131 in the Czech Republic. United and his sons belong to the top of Danish sires. United himself is top 1 Beef Simmental bull in Germany and Czech Republic.

Godske's mother Krogholt Dorthe has currently breeding value of S-index 120, of production 124, of growth 130 and of milk production 111.

### SOLBAKKEN GARFIELD P ZSI 951

Hedetoft United P ZSI 400 x Ostervang Thor P ZSI 389

DK 4271900212 \*6. 9. 2011

Garfield's breeder Rasmus Jensen (DJ Aps) breeds 15- 20 cows, using insamination in the winter time, than using a bull to follow up.

Garfield started the test with a weight 416 kg in 225 days of age and finished it with 759 kg in 365 days of age. His daily gain in the period was 2450g. It is Danish National record.

#### Pedigree:

Hedetoft United has been Danish number 1 bull in the last 9 years. He is also number 1 in Germany and Czech Republic. Te bull is well known in many countries.

Garfield's mother Solbakken Amanda was shown in Danish winter exhibition and her father Østervang Thor is insamination bull.

Father of mother's father Østervang Ringo is insamination bull with very easy calving.

**Danish experts predict Garfield to have really fantastic future with easy birth and fast growing calves. His Danish total index is 135, very close to number 1 Hedetoft United 136.**

# NATIONAL TESTATION CZECH REPUBLIC

## ROSENSTOLZ P ZSI 800

Rosenherz PP x Weinold

DE 943827151

\*1.7.2009

## PRIMA ET PP ZSI 507

Holm Ulrick P x Vingegard Trinidad P

CZ 573000061

\*24. 3. 2007

### Relative breeding values in direct effect

September/2013, Czech Republic

67 offspring/ 10 herds

120 days	210 days	365 days	BV growth
95	93	102	97

### Maternal effect:

BV for growth estimation - 111 (6 daughters)

Prima was born at Chytka's family farm in Mohelno. He comes from combination of sires Holm Ulrick x Trinidad. Mother of Prima CZ181048931 PP comes from a herd of famous Czech breeder Mr. Kolar. Apart from good parametres of growth, development and conformation, we have got interested in Prima due to his homozygously polled character confirmed by DNA test. Honozygously polled bulls are interesting for both purebreedeing and cross breeding, because no matter if the cow is horned or polled, all offspring are being born polled. We sell doses of Prima to Denmark, Germany, Switzerland and other countries.

## **TUAREG PP      ZSI 805**

**Lykke Sirius P x Holm Ulrick P**

CZ 709817061      \*12. 10. 2010

**Relative breeding values in direct effect  
September/2013, Czech Republic**

10 offspring/5 herds

120 days	210 days	365 days	BV growth
126	119	125	123
