JOACHIM PP is a promising homozygous polled bull, distinguished primarily by his outstanding growth potential combined with excellent muscling, capacity and a strong beef type. He achieved an excellent score of 84 points at the breeding selection. In his progeny, we expect not only good growth performance but also easy calving. Joachim himself weighed 38 kg at birth. Joachim offers an interesting pedigree, combining the outstanding French sire RAFIOT PP, a son of another excellent bull, MAGNUM GD P, with his dam Genesis P, sired by the outstanding German bull HINZ PP. Joachim is therefore an excellent choice for herds seeking a combination of growth, beef performance, strong muscling and polled genetics, together with an interesting and proven pedigree.
